SUMMARY

B.Sc. graduate in Computer Science and Engineering from BUET with combined research and industry experience in Artificial Intelligence, Machine Learning, and full-stack software engineering. Skilled in building and evaluating AI systems and production-grade applications, with a research background in LLM-based testing, medical AI, and applied machine learning.

EDUCATION

Bangladesh University of Engineering and Technology (BUET) **2022 – 2026**
Bachelor of Science in Computer Science and Engineering (CSE) **CGPA: 3.60 / 4.00**
Relevant Coursework: Data Structures and Algorithms, Algorithm Engineering, Database Systems, Operating Systems, Computer Architecture, Computer Networks, Compiler Design, Artificial Intelligence, Machine Learning, Computer Graphics
Research Interests: Large Language Model Systems, AI-Assisted Software Engineering, Applied Machine Learning, Medical AI

PROFESSIONAL EXPERIENCE

- **AI Software Engineer** [[R&D Website](#) | [FABINS](#)]
Department of Research and Development (R&D) - Saturn Textiles Limited 2026 – Present
 - Developing and training computer vision and deep learning models for automated fabric inspection through FABINS.
 - Developed and deployed Saturn R&D's full-stack website and FABINS product portfolio.

RESEARCH EXPERIENCE

- **AutoTestGenX: Multi-Agent LLM Framework for End-to-End Web Testing (Undergraduate Thesis)** [[GitHub](#)]
Python • LLM Engineering • Multi-Agent Systems • Web Testing • Browser Automation 2025 – 2026
 - Designed a multi-agent LLM framework to automate web test generation and execution from natural-language requirements.
 - Built benchmark datasets and evaluated against ground-truth suites, achieving 84.0% scenario coverage and 90% error detection.
- **MedCAR: Conflict-Aware Medical Reasoning System (Under Review)** [[GitHub](#)]
Python • Deep Learning • Medical AI 2026
 - Built a multi-model chest X-ray reasoning system with a conflict-resolution pipeline to reconcile contradictory model outputs.
 - Designed a framework using confidence calibration and uncertainty-based abstention for reliable predictions.
- **Bengali-Loop: Community Benchmarks for Long-Form Bangla ASR and Speaker Diarization** [[arXiv: 2602.14291](#)]
Python • Speech Processing • Machine Learning 2026
 - Supported data collection and annotation for a large-scale Bangla Automatic Speech Recognition (ASR) and speaker diarization benchmark, enabling evaluation using Word Error Rate (WER) and Diarization Error Rate (DER).

SELECTED PROJECTS

- **MindTrace: AI-Powered Dementia Care Application** [[GitHub](#) | [Feature](#) | [Infrastructure](#)]
Kotlin • Spring Boot • Spring AI • PostgreSQL • Redis • Firebase • Docker • Azure 2025
 - Engineered an AI-driven Android app for dementia care with an Android frontend and scalable Spring Boot architecture.
 - Designed accessibility-first UI/UX for cognitively impaired users to reduce cognitive load and improve engagement.
- **Gemma VetCare: AI-Assisted Farming Support System** [[GitHub](#) | [Feature](#)]
Kotlin • Android Studio • Spring Boot • Spring AI • MongoDB 2025
 - Built an AI-assisted Android application delivering real-time veterinary diagnosis and treatment recommendations.
 - Designed RESTful APIs optimized for low-connectivity environments with efficient request handling.
- **TCP Window Scaling Attack** [[GitHub](#)]
Python • TCP/IP • Network Security • Wireshark • Linux 2025
 - Built a virtualized MITM lab to demonstrate ARP poisoning and TCP window scaling attacks between client-server VMs.
 - Implemented attack and defense clients and analyzed TCP traffic using Wireshark and packet captures.
- **Compiler Construction (Flex, Bison, 8086 Codegen)** [[GitHub](#)]
C++17 • Flex • Bison/Yacc • Linux 2024
 - Built a full compiler pipeline for a C-like language, covering lexical analysis, parsing, and semantic analysis.
 - Generated optimized 8086 assembly code with symbol table management and basic optimizations.
- **Smart Gardening Automation** [[GitHub](#) | [Feature](#)]
Arduino • Embedded C++ • Sensors • Bluetooth Communication • Automation 2024
 - Developed a gardening automation system integrating environmental sensing and wireless communication.
 - Implemented automated watering, fertilizer/pesticide cycles, smart shade control, and remote monitoring.

TECHNICAL SKILLS

AI/ML: PyTorch, TensorFlow, Scikit-learn, Large Language Models, Prompt Engineering, Multi-Agent Systems, Computer Vision
Languages: Python, C/C++, Java, Kotlin, JavaScript, SQL
Backend & Full-Stack: Spring Boot, Spring AI, Node.js, Express.js, Next.js, REST APIs, React
Databases: PostgreSQL, MongoDB, Redis
DevOps & Tools: Linux, Git, Docker, Docker Compose, GitHub Actions, Firebase, Azure
Mobile Development: Android, Android Studio

ADDITIONAL INFORMATION

Spoken Languages: Bangla (Native), English (Fluent), Hindi & Urdu (Conversational), Arabic (Reading)
Programming Profiles: [NeetCode: mninadmnobo](#) [LeetCode: mninadmnobo](#)
Research Profiles: [ORCID: 0009-0006-2781-6693](#) [ResearchGate: Mohammad Ninad Mahmud Nobo](#)
